

Specifications: Birds & Bees Meadowmat

■ Available from	www.turfonline.co.uk
■ Standard Size	1m ² 500mm wide (19.6") 2000mm long (78.7")
Soil Thickness	18mm to 20mm (0.71" to 0.78")
Roll Weight	18kg – saturated weight may be up to 25kg
Grass height on despatch	Approx. 100mm (4"). The product is mown before despatch to minimise damage to plants. It will not be in flower when it is delivered.

All measurements are approximate and taken when harvested.

■ Growth	Turfonline Birds & Bees Meadowmat is a blend of 4 slow growing grasses and 41 native wildflowers specially selected to be pollinator friendly. Many of the species are perennial which means they will flower every year if the conditions are suitable. The specially selected grasses ensure coverage all year round. Turfonline Birds & Bees Meadowmat will contain mature plants, root fibre and enough soil to maintain the plant during establishment.
----------	--

■ Typical Seed Mixture*	10% Slow growing grasses 90% Native Wildflowers
-------------------------	--

■ Soil Classification	Grown on a sandy loam and compost based substrate
-----------------------	---

Meadowmat for birds and bees keeps the interest going all year round with Spring and Summer flowers and beautiful seedheads in the colder months of the year.

Flowering Times

 **Turfonline.**

Features:

Birds & Bees Meadowmat

■ Features

A mixture of mature plants that allows you to establish dense planting very quickly - more reliable than seeding and less time-consuming than plug planting.

Biodiverse and pollinator-friendly providing a valuable source of nectar and food for many species of insects and birds.

Contains perennial, annual and bi-annual species to ensure a varied display each year.

A mixture of grasses and wildflowers for year-round interest.

Environmentally friendly requiring no fertilisers or pesticides.

Low maintenance – does not require regular mowing.

Prefers a neutral pH but can tolerate acidic or alkaline soils - for best results this product requires installation on a low nutrient soil.

Ideal for:

Biodiverse landscaping schemes

Low maintenance areas

Commercial landscaping

Urban Areas and parks

Domestic gardens

Native wildflowers

Grass/Flowers

Biodegradable turf reinforcement net

Free draining sandy loam with 40% compost

**As sown. The actual percentage of each species contained may vary due to environmental factors. Turfonline makes every effort to ensure wildflower products are free from weeds and pests, however due to the natural way in which these products are grown we cannot guarantee they are 100% pest free on delivery. It is unlikely that you will see every species that is listed. The variation of species present has been developed to suit a wide variety of soils and environmental conditions. This will result in a product that will adapt to individual settings which may mean some species are more successful than others. Contains annual bi-annual and perennial species. If installed after March many species may not flower during the first year.*
