

Specifications: SuDS Meadowmat

■ Available from	www.turfonline.co.uk
■ Standard Size	1m ² 500mm wide (19.6") 2000mm long (78.7")
Soil Thickness	15mm to 20mm (0.59" to 0.78")
Roll Weight	20kg – saturated weight may be up to 25kg
Grass height on despatch	Approx. 100mm (4"). The product is mown before despatch to minimise damage to plants. It will not be in flower when it is delivered.

All measurements are approximate and taken when harvested.

■ Growth	Harrowden SuDS Meadowmat is a blend of 4 native grasses and 30 native wildflowers that have been selected for their ability to root into and stabilise poor nutrient soils. These plants are integrated into a reinforced biodegradable coir blanket. Contains perennial species which means they will flower every year if the conditions are suitable. The specially selected grasses ensures all year round coverage along with strong rooting to aid soil stability. SuDS Meadowmat was originally developed for Sustainable Urban Drainage Systems but is also ideal for any sloped areas, providing stability, low maintenance and colour to otherwise challenging hard to reach areas. SuDS Meadowmat will contain mature plants, root fibre and enough soil to maintain the plants during establishment.
■ Typical Seed Mixture*	50% native grasses 50% Native Wildflowers
■ Soil Classification	Grown on a sandy loam and compost based substrate.

A low maintenance solution for all those hard to reach places. Ideal for slopes, banks, damp soils and the margins of ponds, streams or 'Sustainable Urban Drainage Systems'.

Flowering Times

 **Turfonline.**

Features:

SuDS Meadowmat

■ Features

A mixture of mature plants that allows you to establish dense planting very quickly - more reliable than seeding and less time consuming than plug planting.

Biodiverse and pollinator friendly providing a valuable source of nectar and food for many species of insects and birds.

Contains mainly perennial species to ensure a varied display each year.

Coir blanket offers one of the highest protection grades for a natural non synthetic solution with a lifespan of up to 25 years.

Environmentally-friendly requiring no fertilisers or pesticides.

Low maintenance – does not require regular mowing.

Able to survive both drought and periodic flooding.

Prefers a neutral pH but can tolerate acidic or alkaline soils - for best results this product requires installation on a low nutrient soil or specialist roofing substrate.

Ideal for:

Biodiverse landscaping schemes

Banks and sloped areas up to 65 degrees

SuDS and Bioswale systems

Around ponds and basins

Soakaway trenches

Low maintenance areas

Commercial landscaping

Urban Areas and parks

Domestic gardens

What's in our SuDS Meadowmat

- Salad Burnet
- Selfheal
- Tufted Vetch
- Vipers Bugloss
- White Campion
- Wild Carrot
- Wild Marjoram
- Yarrow

**50% Grasses
50% Flowers**

Native Grasses

Native wildflowers

Grass/Flowers

Free draining sandy loam
with 40% compost

100% Coir fibre
which is biodegradable

**As sown. The actual percentage of each species contained may vary due to environmental factors. Turfonline makes every effort to ensure wildflower products are free from weeds and pests, however due to the natural way in which these products are grown we cannot guarantee they are 100% pest free on delivery. It is unlikely that you will see every species that is listed. The variation of species present has been developed to suit a wide variety of soils and environmental conditions. This will result in a product that will adapt to individual settings which may mean some species are more successful than others. Contains annual bi-annual and perennial species. If installed after March many species may not flower during the first year.*
