

Turfonline Premium Seed

- **Standard Size** 0.9kg bag
- **Sowing Rate**

Over seeding
15g per square metre. 60m² coverage.

Establishing a new lawn
30g per square metre. 30m² coverage.
- **Growth**

Turfonline Turf Premium Lawn seed is ideal for repairing an existing lawn and is the same mixture used to grow our British Standard Premium Lawn Turf, TURF-S6. The inclusion of the decade's most significant progress in Perennial ryegrass breeding, Tetraploid Ryegrass brings new levels of stress resistance as well as excellent summer and winter greenness. The seed cultivars in this mix have been independently selected to provide the best quality sward. This results in a unique blend that produces a finer leaved luxurious but hardwearing lawn. Can also be used to establish a new lawn from scratch.
- **Typical Seed Mixture**

20% Perennial Ryegrass
30% Slender Creeping Red Fescue
40% Strong Creepeing Red Fescue
10% Chewing's Fescue
- **Uses**

High quality landscapes areas
Commercial landscaping
Domestic lawns
Golf tees
Hardwearing amenity sports areas
Urban areas

Purity and germination certified Premium Lawn seed. Ideal for creating new lawns or repairing damaged or thin areas.

Features

Due to the unique mix of species and cultivars this seed will produce a lawn with some shade, drought and salt tolerance.

Good year round colour.

Close mowing capability.

High shoot density with good rhizomatous recovery.

Outstanding tolerance to Fusarium, Red Thread and Dollar Spot.

Compatible with most growing mediums found throughout the UK.
