

Meadowmat flowering times

Woodland Shade Meadowmat

Wondering what to do with that slightly shaded area in your garden? Planting some Woodland Shade Mix Meadowmat will add colour and interest without creating extra gardening jobs for you to do.

Woodland Shade Mix Meadowmat is a blend of 39 native wildflowers and grasses typically found growing in woodland margins and hedgerows. Ideal for those tricky spots in the garden where many garden flowers flounder.

Flowering times vary according to weather conditions, microclimate, plant species and time of installation. Please bear in mind that Woodland Shade Mix Meadowmat cannot tolerate really deep shade.
